2017-08-29	1510	History	<b>WWII Air Crash Detectives</b>	Lost And Confused: Sharp Top Mountain B-52 Crash	01	1	On a cold dark night in February, 1943, five trainees aboard a B-25 Mitchell Bomber struggle to find their bearings. Confused at their exact whereabouts the aircraft finally slams into Sharp Top Mountain high above the American town of Bedford in Virginia. It was the third training crash in the area that night – and the worse. What really caused this accident? Was it because of 'Pilot Error', equipment failure, bad weather, or could the mission have been doomed from the beginning? We join enthusiast Don Yeargin as he pours over the official reports, newspaper clippings and telephone transcriptions together with Computer simulations to demonstrate how this tragic accident was more a failure of procedure than Pilot error. 2017-08-29	1605	History	<b>WWII Air Crash Detectives</b>	Sikorski's Last Flight	01	2	4 July 1943 – 11:07pm: A plane takes off carrying General Władysław Sikorski, Prime Minister of Poland's London-based government in exile and Commander-in-Chief of its armed forces, returning from visiting Polish troops in the Middle East. On take-off, the aircraft suddenly loses height and crashes into the harbour. The 62-year-old Polish general is killed, along with 15 others. The sole survivor is the Czech-born pilot, Eduard Prchal, who is rescued by an RAF launch. The bodies of five passengers and crew, including Sikorski's daughter, are never found. Many questions remain unanswered, raising suspicions that this crash may not have been an accident, and rather an assassination. This programme pieces together the events of that night, the cause of the crash and examines the murky world of WWII international espionage and the case for an assassination.
