|       | The first episode explores the world's most iconic structures of earth. Structures that define nations, challenge humanity, and drive life. Violent geological forces create these icons; collision of tectonic plates, tearing of fault lines, and the uplift of seabeds. From Mt Everest's peak to the Rockies' floor, from Uluru's rusted monolith to cinematic Wadi Rum, these earth icons inspire wonder and awe. |                   |                   |         |    |    |  |  |

|       | Since Earth's fiery birth, fire has played a major role altering the planet. This episode pays homage to this dynamic and often deadly force. Fuelled by molten lava, fire has created some of the world's most memorable icons, including the Hades of Hawaii, smoldering Mount Bromo, boiling Rotorua and blackened Mutnovsky. And in Iceland and Japan, we see how fire not only births icons but changes the planet's destiny. |  |                              |                 |     |  |  |  |  |
