2022-07-12	2030	Biography	Marilyn: Her Final Secret	Premiere	Marilyn Confidential		0	After more than two years of investigation, Label News has just wrapped the production of Marilyn Confidential, a feature documentary which reveals the identity of Marilyn Monroe's biological father, based on exclusive DNA testing. Until now, researchers had been unable to establish with certainty the name of the star's father or decode her DNA - the master key allowing access to some fascinating information about her origins. Marilyn searched for her father throughout her life - the unsolved mystery behind her birth fed the actress's insecurities. Using some strands of Marilyn Monroe's hair, chromosomes from her paternal lineage were analysed in France and the United States, before being compared to those from descendants of one of her mother's lovers. In the end, it was in Toulouse, in the south of France, that a spectacular - and irrefutable - result was obtained by the research teams of Ludovic Orlando, a world expert in molecular archaeology. It establishes the identity of Marilyn's biological father, thus revealing her new paternal family, 60 years after the icon's death.	FRANCE	English-100	2021		M			Y

2022-07-14	1440	History	<b>French Voyages: Discovery To Australia</b>		French Voyages Of Discovery To Australia		0	Could Australia ever have been French? The English certainly thought so. Through revolution, empire and restoration, late 18th and early 19th century France maintained an unwavering commitment to research and discovery in the Pacific region and in Australia. More interested in science than in new colonies, these early French voyages, led by commanders like Bougainville, Lapérouse, D'Entrecasteaux, Baudin, Freycinet, Duperrey and Dumont d'Urville, were the first to name, describe and beautifully illustrate many Australian species. England may have colonised Australia, but for many years it was France that understood it best. This richly illustrated short documentary film brings to life our fascinating and colourful French history and reminds us of a time when scientific research involved intrepid voyages in tall ships on the high seas, battling scurvy and storms, insects and rats, and hostilities both on board and on shore.
