On a deserted beach he uses the historic technique of sand-casting to make the mower's specialised fan, before he goes deep beneath the earth's surface to find iron ore for the steel blade. He travels from Peru to the far north of Inca territory in Ecuador to reveal how the great strengths of the empire suddenly became factors in its rapid demise. The Spanish conquest of the Inca destroyed one of the most remarkable empires in the world, yet the Inca legacy leaves a great deal for modern civilisations to learn from. (From the UK) (Documentary Series) (Part 2 of 2) PG CC ****Final****
- 8:45 pm **The Sugar Conspiracy** - This compelling investigative documentary exposes the US sugar industry's systematic hijacking of scientific study to bury evidence that sugar is, in fact, toxic. For forty years, Big Sugar deflected threats to its multi-billion dollar empire through creative PR and tactics strikingly similar to the way the tobacco industry disguised the fact that its products are addictive and cause fatal illnesses. As obesity rates skyrocket and doctors treat the first generation of children suffering from fatty liver disease, the sugar industry has come under increasing scrutiny from emerging scientific and medical studies. While the industry steps up its advertising spin and lobbying efforts, this film warns that we are sitting on a dietary time bomb. (From Canada, in English) (Documentary) PG CC ****Premiere****
